Senior Leadership Team Profiles

Gregory W. Menas – CEO

Gregory Menas co-founded mPATHX, LLC in 2001. He provides the creative executive leadership, vision, and management skills transforming mPATHX into a thriving leading-edge technology company. To date, he has raised the company's necessary capital, developed key technology, secured product development partners, formed strategic alliances with a skilled team of advisors and businesses and recruited dynamic leaders for the company's critical operational functions.

For more than two decades, Menas honed his entrepreneurial skills developing and leading several companies, including:

- ❖ Interex, Inc., a computer accessory and peripheral company he founded in 1982, and led to \$25 million in annual sales. He sold his interest in 1996.
- ❖ Marche, Inc. He served as President of the industrial engineering firm that contracted with client-companies to cost effectively transform leading-edge concepts into commercially viable technologies and products; and,
- ❖ SWT, Inc. He served as President and CEO for the intellectual property innovator. Its technology supplied Internet and Application Service Providers with a real-time back-office accounting infrastructure and backbone enabling subscribers to order and receive media-on-demand with telecom-grade quality-of service over public Internet Protocol networks.

Menas delivers professional management, infrastructure development and cogent business strategies for successful companies. He provides mPATHX with a network of skilled professionals in the areas of academia, accounting, finance, legal, marketing, operations, product development (concept through wide-scale distribution) and sales. He understands and balances the needs of his company, customers, partners and team members.

Brent A. Miller – Product Development Director

Brent Miller is co-founder and Product Development Director of mPATHX, LLC. He brings cutting-edge product design experience. Prior to joining mPATHX, LLC in 2001, Miller ran his own contract design business producing innovative designs for consumer electronics, motor sports, commercial furniture and interior architecture.

In addition, Miller founded Monolith Engineering, a manufacturer of patented aerodynamic bodywork for the sport of kart racing. Monolith was the first manufacturer in the sport's history to establish baseline testing standards using a wind tunnel. Monolith bodywork was adopted by the sport's top drivers, including six National Champions.

With more than 21 years of design and project management savvy, Miller's proven product design experience is vital to the development of mPATHX's patent-pending technology and products.
